■
A CIN procura constantemente soluções de pintura que respondam com eficácia às diferentes necessidades do mercado, que contribuam para a protecção do meio ambiente e valorização do património. Este catálogo apresenta 165 cores para exterior que aliam a protecção à estética (cor, textura e brilho) dos edifícios. São cores únicas e exclusivas da CIN que resultam de um rigoroso estudo de composição de corantes e pigmentos, realizado pelo Centro de Investigação e Desenvolvimento da CIN, com o objectivo de oferecer uma gama diversificada de cores de elevada resistência em exterior. Todas as cores vêm dar resposta às múltiplas solicitações de escolha de cor, sejam elas de cariz moderno e vanguardista, de pendor mais histórico ou patrimonial, ou ainda de manutenção.

■
CIN constantly seeks painting solutions that effectively meet different market needs, contributing to environmental protection and the enhancement of heritage. This catalogue features 165 colours for exteriors that combine protection and aesthetics (colour, texture and brightness) of buildings. They are unique colours exclusive to CIN, resulting from the meticulous study of the dye and pigment composition by the CIN Research and Development Centre, with the aim of providing a diversified range of colours with high-resistance outdoors. All the colours respond to the multiple colour requests by customers, whether for a modern and avant-garde nature, more related to history or heritage, or whether simply for maintenance purposes.

■
CIN cherche constamment des solutions de mise en peinture qui répondent efficacement aux différents besoins du marché et qui contribuent à la protection de l'environnement et à la valorisation du patrimoine. Ce catalogue présente 165 couleurs pour l'extérieur qui combinent la protection et l'esthétique (couleur, texture et finition) des bâtiments. Ces couleurs sont des teintes uniques et exclusives CIN. Elles résultent d'une étude rigoureuse des colorants et des pigments menée par le Centre de Recherche et Développement CIN. L'objectif principal de cette étude a été de créer une gamme variée de couleurs allié à une excellente résistance en extérieur. Toutes les couleurs de cette gamme offrent des réponses variées pour le choix de la couleur en extérieur, qu'il s'agisse d'architecture contemporaine, de bâtiments historiques, de réhabilitation ou qu'il s'agisse simplement d'entretien des façades.

ESCOLHER COR PARA EXTERIOR

CHOOSING THE COLOUR FOR OUTDOORS
CHOISIR LA COULEUR POUR L'EXTERIEUR

7 CONSELHOS A TER EM CONTA

COMBINAÇÃO 60.30.10.

Uma combinação equilibrada de cor para exterior contém três cores principais em proporções diferentes. Opte por uma cor dominante que deve preencher 60% do espaço (ex: fachada). Uma outra cor secundária (30%) deve ocupar por exemplo, rodapés, molduras, socos ou cunhais. Com o peso de 10% de uma outra cor devem estar detalhes, como portas e janelas. Considere sempre esta regra de harmonia para seleccionar cor na medida certa.

O EFEITO DA LUZ.

No exterior as cores parecem por norma mais claras, por isso aconselhamos que escolha a cor final da sua fachada no local onde vai ser aplicada nas condições reais de luz e em vários momentos do dia (manhã, tarde e fim do dia) para testar todas as variações que podem ocorrer.

ORIENTAÇÃO DO EDIFÍCIO.

Ao escolher a cor da fachada tenha em consideração a orientação da casa. Por exemplo, quando as faces do edifício estão viradas a Sul as cores vão parecer mais quentes, quando viradas a Norte irão parecer mais frias.

7 TIPS TO CONSIDER

COMBINATION 60.30.10.

A balanced combination of colour for outdoors contains three main colours in different proportions. Choose a dominant colour that should fill 60% of the space (e.g. facade). Another secondary colour (30%) must occupy, for example, baseboards, frames, bases or corners. Another colour should have a 10% weight, and be used for colour details around doors and windows, for example. Always consider this harmony rule to select colours in the right measure.

THE LIGHT EFFECT.

Outdoors colours generally seem brighter, so it is advisable to choose the colour of the facade in the place where it will be applied in real light conditions and at various times of the day (morning, afternoon and the evening) to test all the changes that may occur.

ORIENTATION OF THE BUILDING.

Consider the orientation of the home when choosing the colour of the facade. For example, when the faces of the building are facing south the colours will seem warmer, while north-facing spaces will seem colder.

7 CONSEILS A PRENDRE EN COMPTE

COMBINAISON 60.30.10.

Une combinaison équilibrée de couleurs pour l'extérieur est composée de trois couleurs principales dans des proportions différentes. Choisissez une couleur dominante qui devrait couvrir 60% de la surface (par exemple la façade). Une couleur secondaire (30%) par exemple pour les soubassements, les encadrements, ou les angles. 10% d'une autre couleur, pour les détails tels que portes et fenêtres. Il est important de toujours respecter cette règle pour conserver l'harmonie des couleurs.

L'EFFET DE LA LUMIERE.

A l'extérieur les couleurs semblent généralement plus claires, il est donc conseillé de choisir la couleur finale de la façade sur place pour être dans les conditions réelles de la lumière et à divers moments de la journée (matin, midi et le soir) et cela pour tester tous les changements qui peuvent survenir.

ORIENTATION DU BATIMENT.

Au moment de choisir la couleur de la façade prenez en compte l'orientation de la maison. Par exemple, lorsque les façades du bâtiment sont orientées vers le sud, les couleurs semblent plus chaudes, tandis que celles orientées au nord paraîtront plus froides.

■ ESPAÇO ENVOLVENTE.

Tenha em atenção o tipo de ambiente (urbano ou rural, moderno ou histórico...) onde a casa se insere, a sua arquitectura (tipologia e estilo de construção), bem como a natureza existente e a geografia (paisagem e clima). Pode preferir que a fachada se destaque das outras. No entanto, sugerimos que a selecção de cor fique em harmonia com o espaço que o rodeia.

■ REALÇAR MATERIAIS NOBRES.

Opte por cores que valorizem os materiais existentes na fachada, como o granito, calcário, mármore; que por norma não são pintados. O ideal será escolher um tom contrastante ao do material a destacar.

■ ESCONDER OBJECTOS.

Pode ocultar elementos que considere pouco harmoniosos, como caixas de contadores de água e electricidade, caleiras e condutores, pintando-os da mesma cor ou num tom similar à cor que rodeia o objecto.

■ TESTE DE COR.

A textura da superfície altera a aparência de cor devido aos efeitos de luz e de sombra, além de que pintar uma fachada é sempre um investimento superior ao da pintura de uma divisão interior. Por isso, recomendamos sempre a realização de um teste de cor antes da aplicação final.

■ SURROUNDING AREA.

Note the type of environment (urban or rural, modern or historical...) around the house, its architecture (construction type and style) and proximity of nature and geography (landscape and climate). You may want the facade to stand out from the others. However, we suggest that the selection of colour remain in harmony with the surrounding area.

■ HIGHLIGHT NOBLE MATERIALS.

Choose colours that enhance the materials on the facade, such as granite, limestone, marble, that are normally not painted. Ideally, choose a contrasting shade to highlight the material.

■ HIDE OBJECTS.

You can hide non-harmonious elements, such as water and electricity meter cabinets, lightning conductors and gutters, painting them the same colour or a shade similar to the colour surrounding the object.

■ COLOUR TESTING.

The surface texture changes the appearance of the colour due to the effects of light and shade. Considering the fact that painting a facade always implies greater investment than painting an indoors room, we always recommend colour testing before final application.

■ ENVIRONNEMENT.

Notez le type d'environnement (urbain ou rural, moderne ou historique...) où se situe la maison, son architecture (le type et le style de la construction), la nature environnante et la géographie (paysages et le climat). Vous préférerez peut-être que la façade se distingue des autres, cependant, il est préférable lors du choix de la couleur de rester en harmonie avec l'espace qui l'entoure.

■ METTEZ EN VALEUR LES MATERIAUX NOBLES.

Choisissez des couleurs qui font ressortir les matériaux de façade existants tels que le granit, le calcaire, le marbre, qui, normalement, ne sont pas peints. Idéalement, préférez une teinte contrastante pour mettre en valeur le matériau.

■ MASQUER LES OBJETS.

Vous pouvez cacher les éléments disgracieux, comme les armoires électriques et les compteurs d'eau, les gouttières, pour cela, il est conseillé de les peindre de la même couleur ou d'un ton similaire à la couleur entourant l'objet.

■ TEST DES COULEURS.

La texture de la surface change l'apparence de la couleur à cause des effets de lumière et d'ombre, et, peindre une façade est toujours un investissement plus important que peindre un intérieur. Par conséquent, il est recommandé de réaliser un test de couleur avant l'application finale.

OS BRANCOS

AS TONALIDADES DO BRANCO AJUDAM A AMPLIAR OS ESPAÇOS E MISTURAM A ELEGÂNCIA DO CLÁSSICO COM O CONTEMPORÂNEO.

ACABAMENTOS

A fachada é um elemento essencial do património arquitectónico, importante de preservar, e que mobiliza toda a atenção da CIN. As superfícies exteriores são submetidas a condições extremas: sol, raios UV, chuva e humidade; responsáveis pela sua degradação. A CIN oferece uma ampla gama de soluções desenvolvidas especificamente para responder às necessidades das paredes exteriores.

Adaptada a obras tradicionais ou contemporâneas, mas também para a resolução de múltiplas problemáticas, a gama de Fachadas CIN tem uma elevada performance técnica, permitindo em simultâneo reparar, proteger e embelezar as fachadas.

As 165 cores deste catálogo estão disponíveis em Nováqua HD e são afináveis no sistema Colormix3G. Algumas cores deste catálogo podem não estar disponíveis em todos os produtos da gama.

FINISHES

The facade is an essential element of architectural heritage, important to preserve, and which engages all of the attention of CIN. The outer surfaces are subjected to extreme conditions: sun, UV rays, rain and moisture, which are responsible for the degradation of the surface. CIN provides a wide range of solutions specifically developed to meet the needs of outdoor walls.

The range of CIN Facades, adapted to traditional or contemporary works, and also for solving multiple problems, offers high-level technical performance, which simultaneously provides for the repair, protection and embellishment of facades.

The 165 colours of this catalogue are available in Nováqua HD and they can be fine-tuned in the Colormix3G system. Some colours of this catalogue may not be available in all the products of the range.

FINITIONS

La façade est un élément essentiel du patrimoine architectural, il est important de le préserver, CIN y apporte une attention toute particulière. Les surfaces extérieures sont soumises à des conditions extrêmes: le soleil, les rayons UV, la pluie et l'humidité, sont responsables de leur dégradation. CIN offre une large gamme de solutions développées spécifiquement pour répondre aux besoins des peintures de façades.

Adaptée aux ouvrages traditionnels ou contemporains, mais aussi pour résoudre des problèmes multiples, CIN propose une gamme de revêtements de façades de haute performance, permettant simultanément de réparer, protéger et embellir les façades.

Les 165 couleurs de ce catalogue sont disponibles en NOVÁQUA HD et réalisables avec le système Colormix 3G. Il est possible que certaines couleurs de ce catalogue ne soient pas disponibles dans tous les produits de la gamme.

Escolher a cor é um dos momentos mais importantes na pintura de uma fachada. Consciente disso, a CIN fez todos os esforços para assegurar a reprodução fiel das cores neste catálogo. No entanto, em virtude de limitações técnicas de impressão, as cores podem apresentar diferenças face às originais. A cor aplicada pode variar ligeiramente conforme a natureza da superfície, a luz, a textura/acabamento do produto e o número de demãos. Recomenda-se, por isso, a realização de um teste de cor na superfície a pintar antes de qualquer aplicação final. A CIN não se responsabiliza pelas consequências de uma escolha ou aplicação incorrecta da cor seleccionada.

Choosing the colour is one of the most important acts in painting a facade. CIN has made every effort to ensure the faithful reproduction of colours in this catalogue. However, due to technical limitations of printing, the printed colours may differ from the actual colour. When painted on the surface, the colour may vary slightly depending on the nature of the surface, the light, texture/finish of the product and the number of coats. It is therefore recommended that a colour test be carried out on the surface to paint beforehand. CIN is not responsible for the consequences of an incorrect choice or application of the selected colour.

Choisir la couleur est l'une des étapes les plus importantes lors de la mise en peinture d'une façade. Conscient de cela, CIN a tout fait pour assurer une reproduction fidèle des couleurs de ce catalogue. Toutefois, en raison de limitations techniques de l'impression, les couleurs peuvent présenter des différences par rapport aux teintes originales. Une couleur peut varier légèrement une fois appliquée en fonction de la nature de la surface, de la texture, de la finition du produit et du nombre de couches. Il est donc recommandé d'effectuer un essai de couleur sur la surface avant toute application finale. CIN n'est pas responsable des conséquences d'un choix ou d'une application incorrecte de la couleur sélectionnée.
